

## Environmental Policy

Kvist Industries A/S will show great commitment and will be proactive for minimizing both production and products environmental impact. Our environmental efforts are characterized by constantly asking questions and introduce improvements. The goal is to limit the direct environmental impacts of our activities and to offer products and services, which support innovation and reduction of environmental impacts.

### Sustainable materials

To ensure that all of our wood suppliers are coming from a legal forest operation and that they primarily use wood from certified forests, Kvist Industries is FSC® certified and will recommend the use of certified materials.

### Efficient transportation

We transport our goods in the most efficient and friendly environmental way and we use recyclable packaging. We also want to process as much as possible products close to the original material as possible. Therefore, transportation and environmental impacts are minimized.

### Communication

We maintain an open dialogue about environmental issues both internal and external with our suppliers, partners, and organizations.

### Competencies / Qualifications

To maintain and develop our employee's environmental knowledge and to raise awareness of resources through information and training.

### Work environment

To develop a work environment that promotes environmental considerations in all developments- and operating tasks as well as security in all processes.

### Saving energy

To increase energy efficiency through behavioral changes. Including energy optimisation, use of the new technology to minimise the come and goes, recycling of air and heat etc.

### Consideration

To use materials and energy wisely and to ensure that residues from production and waste are recycled.

### **Responsibility**

Planning to prevent environmental accidents and minimise the use of materials and chemicals that can be hazardous to people or nature.

### **Lifecycle**

To take into account the entire life cycle in order to reduce environmental impact now and in the future. This as well in the department of new products and in improving the quality of existing products to ensure product longevity.

### **Compliance with legislation**

At Kvist Industries, we will, at any time comply and surpass all requirements defined by the relevant legislation, policies, regulations, and standards that exists on the environmental field.
